

1. Please tell something about yourself?

⇒ Hello, my name is Aminur Rahman.. I am passionate about creating visually appealing and user-friendly websites. During my academic journey, I developed a strong foundation in front-end technologies such as HTML, CSS, and JavaScript.

I have hands-on experience with modern front-end frameworks like React.js, and I am proficient in using version control systems such as Git. I am dedicated to staying up-to-date with the latest industry trends and technologies to enhance my skills continuously.

2. Tell us something about your strength.

⇒ I am passionate about learning and hard work. In my journey with web development, I have faced challenges and errors, but I have never given up, I have solved all the errors I have encountered so far. Instead, I dealt with them, developing a positive mindset that I bring to my professional endeavors.

3. Tell us something about your weakness.

⇒ I have weaknesses in English speaking and unique UI design.

English is not my native language, and while I am proficient, I am actively working to improve my spoken English through language courses and regular practice. In the same way, I am also improving myself in UI design.

4. Tell us something about your best project.

⇒ During my six-month experience, my project Hotelhub - a Generic Hotel Booking Website was a unique eye-catching design, secure, and responsive platform that facilitated an effortless booking experience. Users can easily customize dates, share feedback, and manage reservations with ease. The project exemplifies a blend of style and functionality, ensuring a hassle-free journey from the initial booking stage to cancellation. I am particularly proud of how this demonstrates my ability to provide a user-centric and secure solution that enhances the overall experience for the end user.

5. What is your vision in this web development field that you want to achieve in next 4-5 years?

⇒ In the next 4-5 years, I aspire to evolve into a senior full-stack MERN developer. My goal is to contribute to impactful projects, with my skills in both front-end and back-end development. Ultimately, I aim to secure a position in a leading tech giant such as Google, Microsoft, or Amazon. I'm committed to continuous learning and staying abreast of industry trends to achieve this vision.
