Objective:

As a front-end developer, I am enthusiastic about joining a collaborative team that values my expertise in web development. Actively seeking an opportunity within a professional environment where I can continue to enhance my skills, learn from experienced colleagues, and contribute significantly to impactful projects.

Technical Skills:

Expertise: React, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, WordPress.

Comfortable: Express.js, MongoDB, JWT, Firebase, Axios

Familiar: Material UI, Node.js, Stripe, Next.js

Tools: VS Code, Git, GitHub, Figma, Photoshop

Projects:

Hotelhub - MERN Generic Hotel Booking Website

[Preview](#) | [Frontend Code](#) | [Backend Code](#)

- **API Security:** Ensures data security by employing JSON Web Token (JWT) authentication. Only authenticated users have access to API data, ensuring data integrity and confidentiality.
- **Booking System:** Users can book available rooms with valid dates. If booked other users can't book this room. Users can customize the date and cancel the booking before the check-in date.
- **Reviews and Rating:** Users can submit reviews and ratings of hotels they have stayed at.

Technologies: React, Firebase and JWS Authentication, Express js and MongoDB etc.

TechFirmIT - MERN IT Company Management Web App

[Preview](#) | [Frontend Code](#) | [Backend Code](#)

- **Multi-Vendor:** The dashboard will display data according to the user's role. According to the user's role, different information will be displayed, and different behaviors will work.
- **Added payment method,** only HR can make payments and a user can pay salary only once in a month.
- **Enhance user data security** with the use of JWT, offering a robust and efficient authentication solution.

Technologies: React, Axios, Tanstack Query, Stripe, MongoDB, Express, Firebase etc.

Automotive- React Car Dealer Webshop

[Preview](#) | [Frontend Code](#) | [Backend Code](#)

- Users have the capability to both sign in and log in, facilitated through Firebase authentication protocols.
- Authenticated users have the privilege to create and update products, as well as add items to and remove them from the shopping cart.

Technologies: React, Tailwind CSS, Sweetalert, MongoDB, Express, Firebase etc.

Language:

Bangla-Native | **English-Fluent** | **Hindi-Comfortable**

Certification:

[Complete Web Development Course-Certified by Programming Hero.](#)
